Abstract: (ENG) <sec>PURPOSE: To obtain in organometal modified polyolefin catalyst for enhancing molecular characteristics of a polymer. CONSTITUTION: A mixed α -olefin polymn. catalyst contains a Ziegler- Natta catalyst component (a) and an organometal modified component having metallocene (b) as essential components and shows double-humped distribution in a mol. wt. distribution of a formed polymer (1) and/or enhanced response as compared with a typical Ziegler-Natta polymn. catalyst (2).</sec>
